- 26" lens.

STAND-ALONE VISION TESTER

Designed for accurate and reliable vision screening, the Titmus V4 provides a comprehensive range of eye tests and features that can minimise consultation times, improve workflows, improve record keeping and deliver comprehensive patient results.

Visual acuity (near, far and optional intermediate), depth perception, colour perception, phoria, and peripheral eye tests can all be completed in a very efficient and accurate manner.

A vision tester which can also provide night vision tests should your screening programme require this type of eye testing.

FAST AND ACCURATE SCREENING

A standardised light source provides true colour testing environment, an adjustable viewing function and a soft easy to clean head sensor provide a controlled and accurate test environment for serial acuity measurements.

Maintenance free and with no calibration required, this vision tester is a cost effective solution for eye care professionals and occupational vision screening requirements.

CONTROL IT YOUR WAY

There are two versions available for the Titmus. For ease of use, the Titmus V4 is supplied with a remote control panel which identifies all the test parameter controls and positions to ensure reduced test times. The Titmus V2 controls are built into the side of the instrument with the control panel identifying all the test parameter controls and positions.

KEY FEATURES:

- Compact and portable
- Ergonomic
- Head sensor for accurate head positioning
- Remote control panel
- True colour testing
- Comprehensive range of test parameters
- Night vision tests
- No calibration required
- Ideal for industrial and DSE screening needs.

CPT codes

99173: screening test of visual acuity quantitative, bilateral

99174: instrument-based ocular screening

The Titmus V4 is manufactured by Titmus LLC and is distributed by Amplivox Ltd.
