

For everyone

Occupational Health training courses

For completing consistent & accurate
health screening assessments

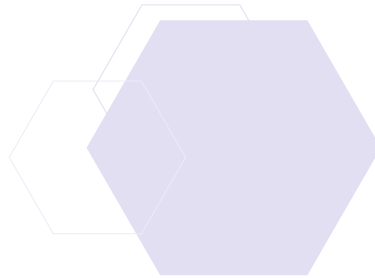

Audiometry | Spirometry | Vision screening

Why choose Amplivox?

We are trusted by many leading occupational health companies and departments in both public and private sectors to provide proven training schemes.

Developed specifically for occupational health professionals, our audiometry, spirometry and vision screening courses ensure delegates have the necessary skills for a standardised, accurate and consistent approach to health screening.

Our courses

Audiometry courses

We provide a two-day assessed competency course based on a recommended syllabus of the British Society of Audiology (BSA) and the Health & Safety Executive (HSE).

We also offer a one-day refresher course for professionals looking to update their skills and knowledge as required.

Spirometry courses

A practical one-and-a-half-day competency course providing theoretical, practical and interpretational skills in conducting respiratory tests within an occupational health environment.

As well as a one-day refresher course for individuals who require a refresher in all aspects of occupational spirometry measurements and interpretation.

Vision course

A comprehensive one-day course incorporating all theoretical and practical aspects of industrial vision screening programmes.

The course includes vision requirements, screening tests, results analysis, and potential hazards in the workplace.

Our courses are independently accredited and registered to provide delegates with Continuing Professional Development (CPD) points.

Audiometry

We have developed a suite of occupational audiometry screening courses focused specifically for occupational health and primary care professionals.

Our occupational audiometry courses are based on the recommended syllabus by the British Society of Audiology (BSA), and have been further developed with the Health and Safety Executive's (HSE) Control of Noise at Work regulations (2021), together with industry-specific requirements and occupational health specialists.

Two-day competency course

Introducing the principles of a hearing conservation programme in the workplace, the two-day competency course provides the knowledge and practical skills required to be proficient in carrying out screening audiometry, evaluation and categorisation of test results.

One-day refresher course

Our one-day audiometry refresher course is a theory and practical course, designed for occupational health professionals who require a general updating of their skills and knowledge to complete screening audiometry in the workplace to the highest standard.

Course content includes:

- Basic acoustics
- Anatomy and physiology
- Physical Agents (noise) Directive
- Factors affecting test accuracy
- Otoscopy
- Techniques of AC audiometry
- Audiogram interpretation
- HSE Categorisation

Our courses are independently accredited and registered to provide delegates with Continuing Professional Development (CPD) points.

Spirometry

Our spirometry courses have been designed to develop theoretical, practical and interpretational skills in order to conduct respiratory testing within an occupational health environment.

We offer competency based and refresher level training for both new and existing occupational healthcare professionals within all aspects of spirometry.

One-and-a-half-day competency course

A complete and comprehensive spirometry course intended for OH trained individuals who have experience of spirometry measurements and who require competency-based assessment to conduct lung function measurements.

The course focuses on theoretical and practical aspects of spirometry measurements and the interpretation of pulmonary function test results. Includes a written and practical examination based on course content learnt on day one.

One-day refresher course

Our one-day occupational spirometry refresher course is the perfect add-on for occupational health professionals who require an annual update or refresher training in all aspects of occupational spirometry measurements and interpretation.

The course is ideal for individuals who have already taken the one-and-a-half-day competency course or currently conduct spirometry in the workplace and are looking to keep up to date with the latest standards and best practice in lung health.

Course content includes:

- Anatomy of the respiratory system
- Spirometry protocols
- Hygiene and infection control
- Calibration requirements and practical session
- Consistency of measurements
- Factors that can cause measurement errors
- Peak flow meters & practical session
- Interpretation and practical session
- Written assessment (competency course only)

Our courses are independently accredited and registered to provide delegates with Continuing Professional Development (CPD) points.

Vision

The challenge many occupational health professionals face is that there are few national standards, with a tendency for vision assessments to be occupation specific.

This comprehensive one-day vision screening training course is designed to offer education and training for occupational healthcare professionals who are conducting or intending to conduct vision screening in the workplace.

The course aims to incorporate many of the occupation specific assessments, including both theoretical and practical aspects. The course includes vision requirements, eye examinations, vision test parameters, results analysis and hazards in the work environment.

The objectives of the course are to provide delegates with the knowledge to detect individuals with visual disorders including those with visual acuity, depth perception and colour difficulties. The course will also provide delegates with the knowledge to identify individuals in need of referral for a more comprehensive eye examination.

Course content includes:

- The eye (anatomy & physiology)
- Vision standards & screening
- Visual measurement tests
- Colour vision testing
- Visual disorders
- Health and safety regulations

Our courses are independently accredited and registered to provide delegates with Continuing Professional Development (CPD) points.

Learning options

We offer several training options to provide a flexible learning programme. Our expert tutors will take the time to understand your organisation's learning needs and provide a bespoke training solution that's right for you.

In-company training

We provide flexible in-company training options for organisations that have a number of delegates who require the same training.

Our on-site training hub located in the heart of the midlands is ideally situated for national OHSPs learning. Alternatively we can visit organisation's premises and deliver a course at a time and place to suit your needs.

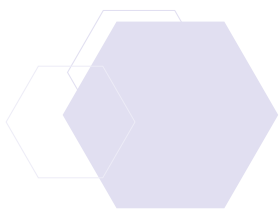

This is an effective way of training several delegates at the same time. Saving on time, travel and accommodation expenses, and ensuring less disruption of day-to-day work activities.

Regional training

Our regional occupational health training courses are delivered across the UK, making our expertise and knowledge accessible to everyone.

Each course combines both theoretical and practical sessions which provide delegates with the knowledge to understand the 'why' and the 'how' and to put what they have learnt in to practice.

Our courses are designed to be informative, educational, practical and enjoyable, and are a great way for delegates to meet other people within the same profession.

“

Clear, concise, flowed easily. The trainer had unending patience and answered every question kindly and precisely.

Trust Pilot

Payment & pricing

Reserve your place on one of our professionally accredited audiometry, spirometry or vision occupational health training courses.

Get in touch

To let us know you'd like to attend one of our occupational health training courses, contact us by email at hello@amplivox.com or complete the reservation form on our website. Once we have received your reservation request one of our advisers will contact you in due course.

Invoice

We will send you a proforma invoice following your reservation. (You will not be guaranteed a place on the course until payment is received). We will contact you typically four weeks before the course date to confirm the course is running. Venue information and timetables will be sent at this stage.

Payment

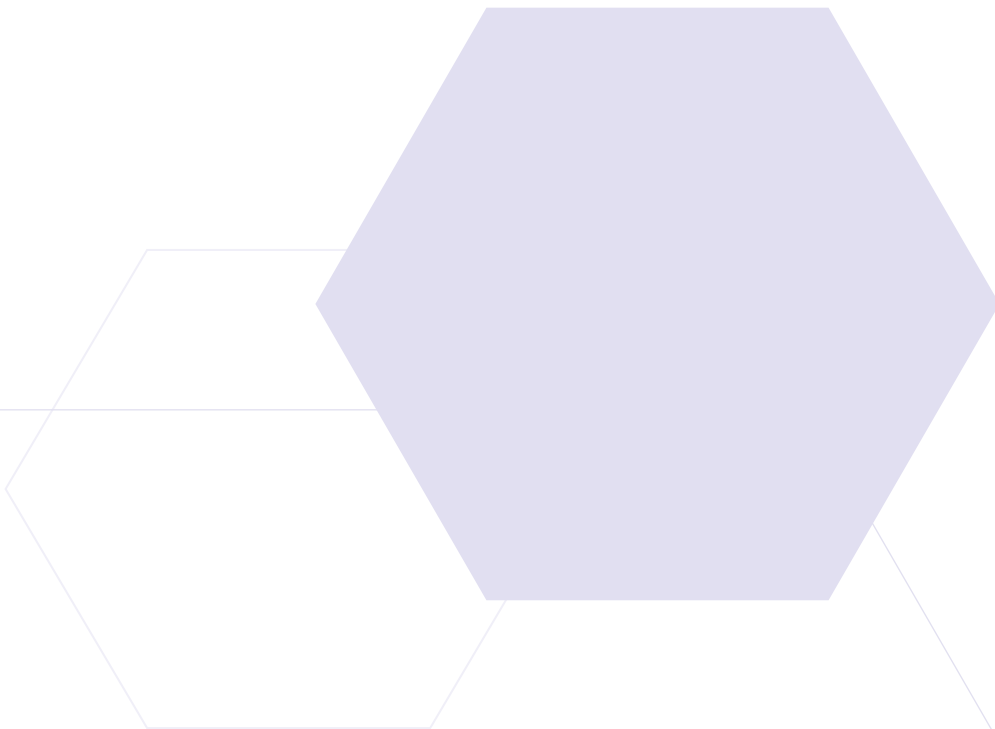

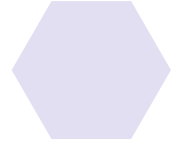

After receiving your invoice, you may then choose how you wish to pay for your chosen course and guarantee your place. If your company will only pay our proforma invoice with a purchase order number, please make sure you submit a purchase order with your reservation.

Training course	Price (Exc. VAT)	Price (Inc. VAT)
Two-day occupational audiometry competency course	£610.00	£732.00
One-day occupational audiometry refresher course	£375.00	£450.00
One-day occupational vision screening course	£375.00	£450.00
One-day occupational spirometry refresher course	£375.00	£450.00
One-and-a-half-day occupational spirometry competency course	£490.00	£588.00

All prices do not include travel or accommodation costs. Refreshments and lunch are included on each full day of training. Amplivox will confirm the course a minimum of 4 weeks prior to the specified course date. If a reservation is cancelled within 4 weeks of the course date a 50% charge would be held. If a reservation is cancelled within 2 weeks of a course date, no refund would be available. Amplivox reserve the right to alter the course programme without notice and to refuse any registration. A PDF certificate will be sent out after the course. Hard copy certificates will be an additional £50 to cover production and administration costs.

Payment options: Payment can be made by either credit or debit card on receipt of the proforma invoice. Alternatively, payment can be made via bank transfer (quoting your proforma invoice number).

Cheques can be posted to: Amplivox Ltd, 3800 Parkside, Solihull Parkway, Birmingham Business Park, Birmingham, West Midlands, B37 7YG (Made payable to Amplivox Ltd).
