

How to apply the Microsoft patch to rectify the .NET printing issue

The following document provides instructions on how to apply a patch to rectify recent printing issues introduced because of a Microsoft Automatic Update.

Please ensure that you have Administrator Rights enabled on your user account ahead of proceeding with the following steps.

1. Press this link to get to the download page of the Microsoft patch software:

https://support.microsoft.com/en-us/topic/kb5022083-change-in-how-wpf-basedapplications-render-xps-documents-a4ae4fa4-bc58-4c37-acdd-5eebc4e34556

2. You should be directed to this page in your web-browser.

You will need to download the relevant patch in accordance with your Microsoft Operating software version. To find this on your computer press the 'Start' icon and search 'About' to get to systems settings, 'About your PC' (see icon below).

On pressing this, the important information you require to decide which patch to download is in the following location:

Settings		– a ×
ŵ Home	About	
Find a setting $\prescript{\mathcharge}$ System	Your PC is monitored and protected. See details in Windows Security	This page has a few new settings Some settings from Control Panel have moved here, and you can copy your PC info so it's easier to share.

	Read the Microsoft Software License Terms	

The above instance would require the patch for Windows 10 Version 21H2 64-bit to be downloaded and applied.

3. Press on 'Catalog' against the relevant version of your Windows version in the Microsoft webpage you have opened in step 2. This should open a new window (shown in step 4.).

For this patch, Amplivox products and software require the .NET Framework version 4.8.
