

Global Operations Graduate Programme

Demant

Are you interested in challenging how a leading, global company runs Global Operations across several continents? Kick-start a career that truly matters by applying for the Graduate Programme at Demant!

The Programme

We have developed a two-year programme where you through four job rotations, lasting six months each, will be exposed to challenging projects and tasks that will provide you with a broad understanding of our business.

The main purpose of the Graduate Programme is to give you a broad understanding and a holistic overview of our business. We believe this is the best way to kick-start a career in Demant.

Demant – who we are

We are a leading global company in hearing health-care and the parent company behind commercial successes such as Oticon, Bernafon, Audika, Oticon Medical and EPOS. Demant operates in a global market with companies in more than 30 countries, and our products are sold in more than 130 countries. We have more than 15,000 employees worldwide and generate annual revenue of more than DKK 15 billion.

We offer

During the two-year programme, you will be working closely with a Host Manager to plan your rotations and tasks to ensure that they are shaped to match with your competences and interests as well as the needs of the business.

You will act as a technical project manager in our team, combining technical and business understanding. In your rotations, you will drive forward our initiatives for optimizing our value chain, manufacturing capabilities and processes. Regardless of the tasks, one thing is certain: You will face a steep learning curve with a high degree of responsibility from day one.

Are you a match?

- We imagine that you are about to graduate or that you have graduated no more than two years ago and hold a relevant master's degree within production engineering, supply chain management, operations, sourcing and procurement, or similar.
- You are a top performer, you contribute to team work by being driven and curious and, just as importantly, you are humble and fun to work with
- You have a strong passion for technology, Lean, machine learning, and optimization of production and manufacturing processes.
- You go for the ambitious goal, but in a humble way, both in your approach to tasks and in your communication with others
- You are fluent in English, have an international profile and are open to potentially spending part of the programme abroad
