# The **sound choice** for a good fit

Oticon's new Ready Fit CIC offers a unique alternative to custom-made CICs.

## Ready Fit across all price points

Ready Fit CIC with wireless functionality is available for the Oticon Alta2, Nera2 and Ria2 families. All of these products are built on BrainHearing™ technology and powered by our new Inium Sense platform.

Ready Fit is compact shells, discreetly fitted in the ear and very comfortable to wear. Listening comfort is assured by the comfortable vent and new Inium Sense feedback shield.

Ready Fit CIC

Faster, smarter, accurate fitting with all the most advanced Oticon features - Ready Fit CIC offers the best of all worlds.

## Advanced features and technologies

All instruments benefit from the same advanced features and technologies as the corresponding custom-made wireless CIC:

- Highly discreet fitting
- Binaural processing
- Wireless technology
- BrainHearing™ technology
- Remote control
- ConnectLine enabled with audio streaming, apps and MFi.

# Ready Fit for you and your clients

## Fast, comfortable and effective

Ready Fit CIC is a valuable new alternative to support you in identifying the perfect hearing solution for each client and offers advantages for both you and your client. Not only will Ready Fit take you to the best possible solution faster - your clients will also enjoy a minimally intrusive fitting experience that achieves an excellent outcome.

## Alternative fitting solutions

In the event that Ready Fit CIC does not sit comfortably in a client's ear or is too loose, for example, simply choose one of Oticon's other solutions.

## Did you know?

*Ready Fit CIC is a fully featured instrument, pre-manufactured with a discreet and ultra-compact standardised shell that will fit the majority of your clients.*

## Candidacy

To help you establish whether a client is a candidate for using Ready Fit CIC, simply order a kit with two Fit testers CIC.
