Swiss Hearing Day 2021

The new era of hearing acoustics, DNN, Artificial Intelligence in audiology

Exponential growth accelerates breakthroughs in Tech

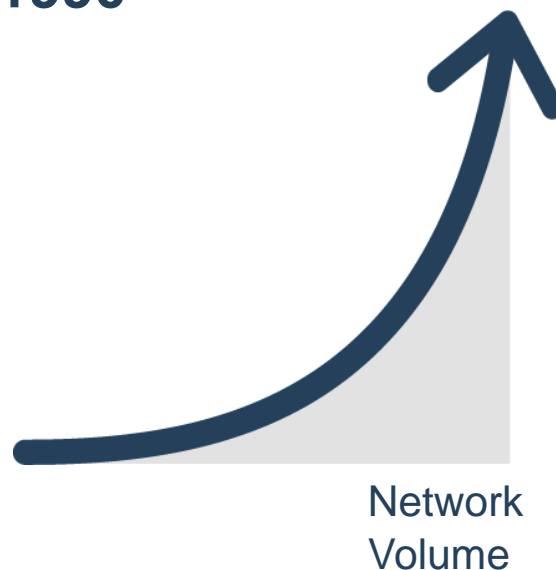

1970

Moore's law

The observation that the number of transistors in dense IC doubles about every two years

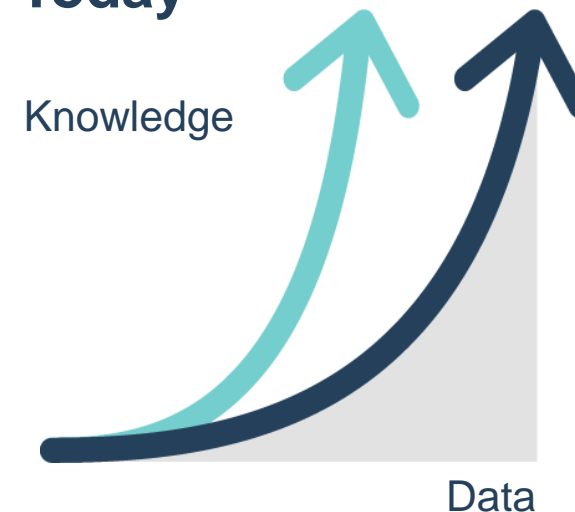

1990

Metcalfe's law

The effect of a network is proportional to the square of the number of connected users

Today

“Watson's” law

Take data, add AI to it and get exponential learning; ability to out-learn everybody else

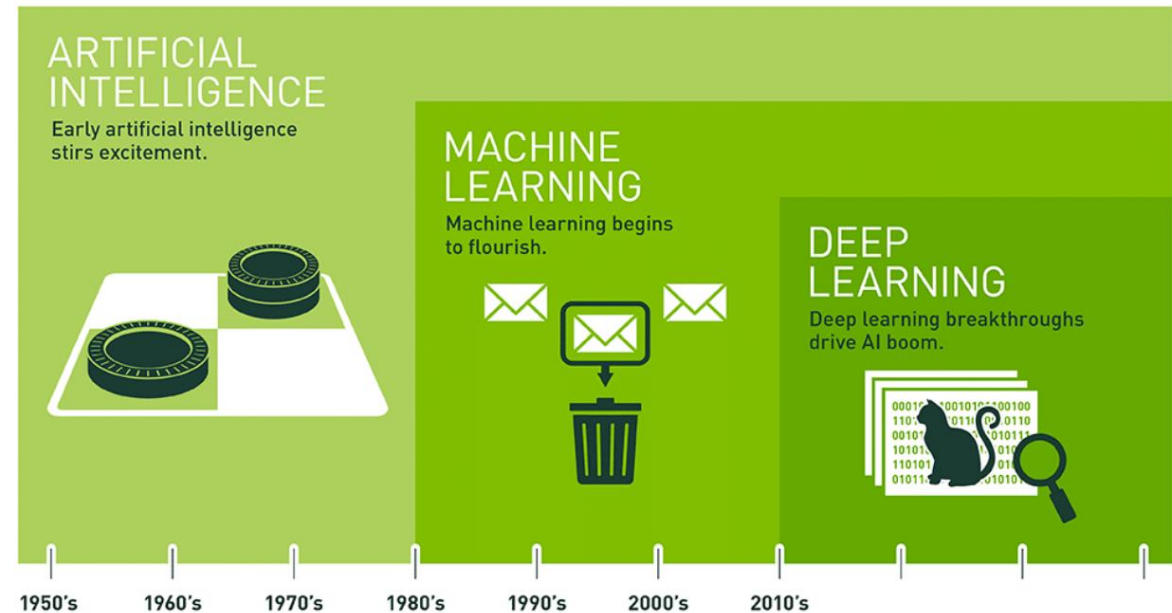

Definitions

Artificial Intelligence

- Artificial intelligence leverages computers and machines to mimic the problem-solving and decision-making capabilities of the human mind

Deep Neural Network

- a technology built to simulate the activity of the human brain – specifically, pattern recognition and the passage of input through various layers of simulated neural connections

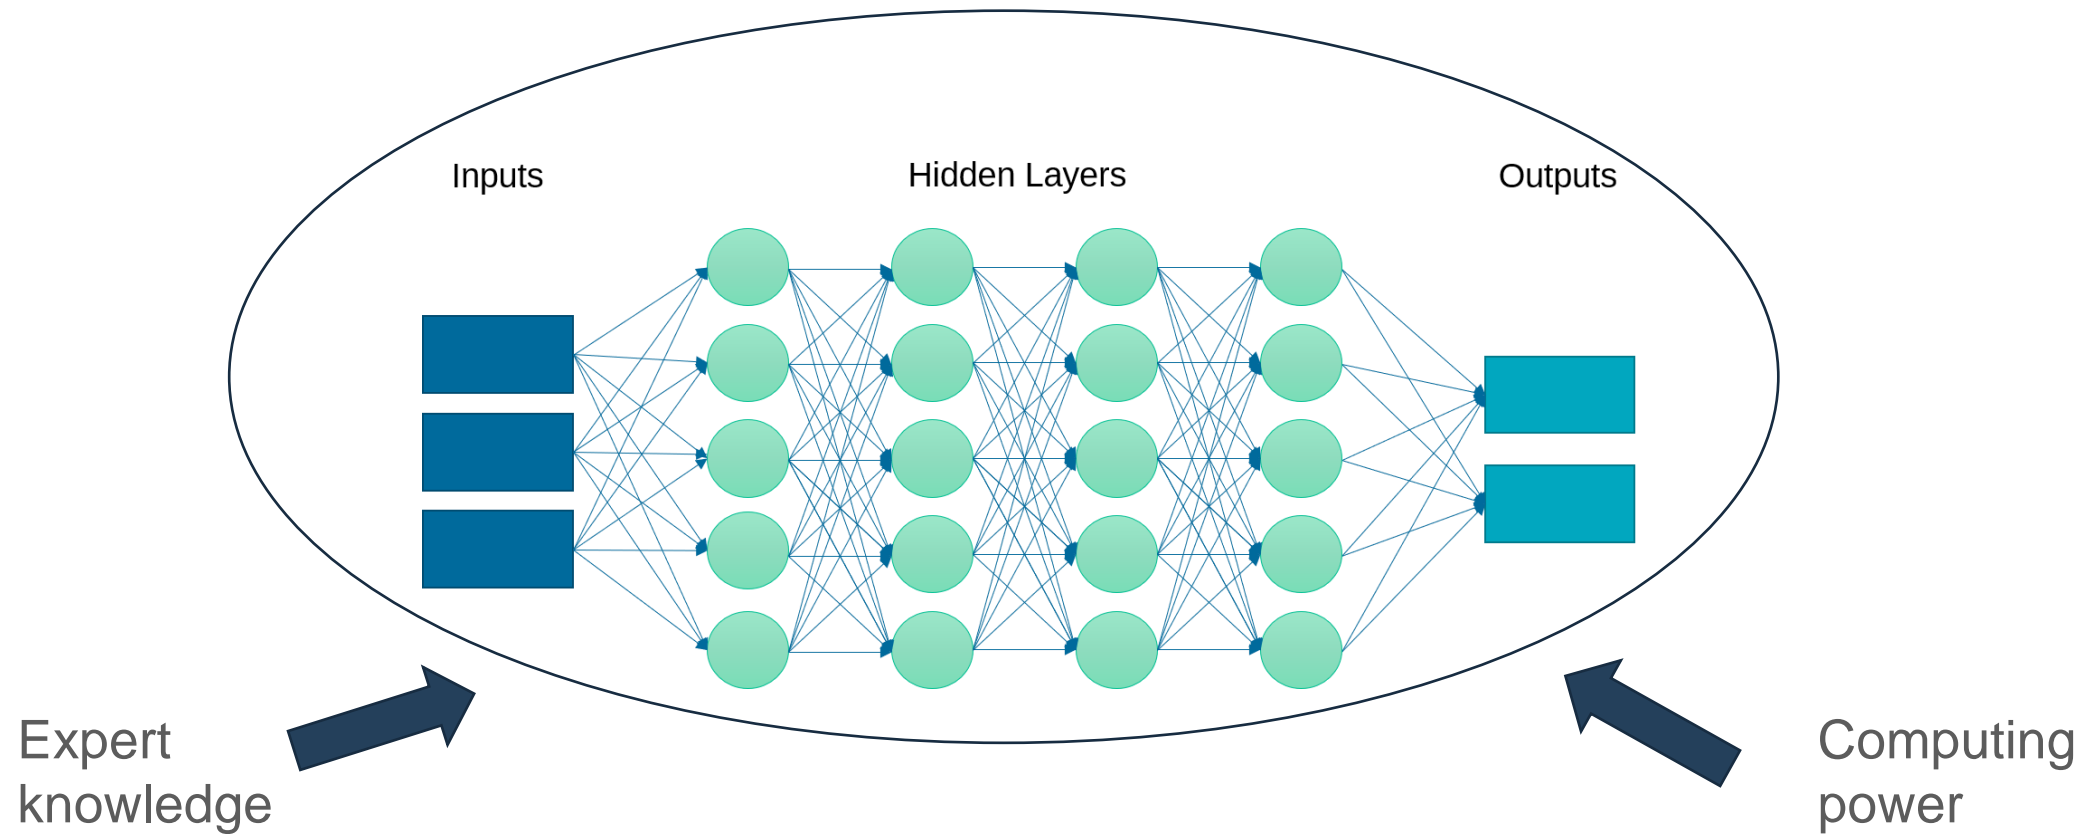

AI processing can work wonders

Example old photo restored/enhanced with AI

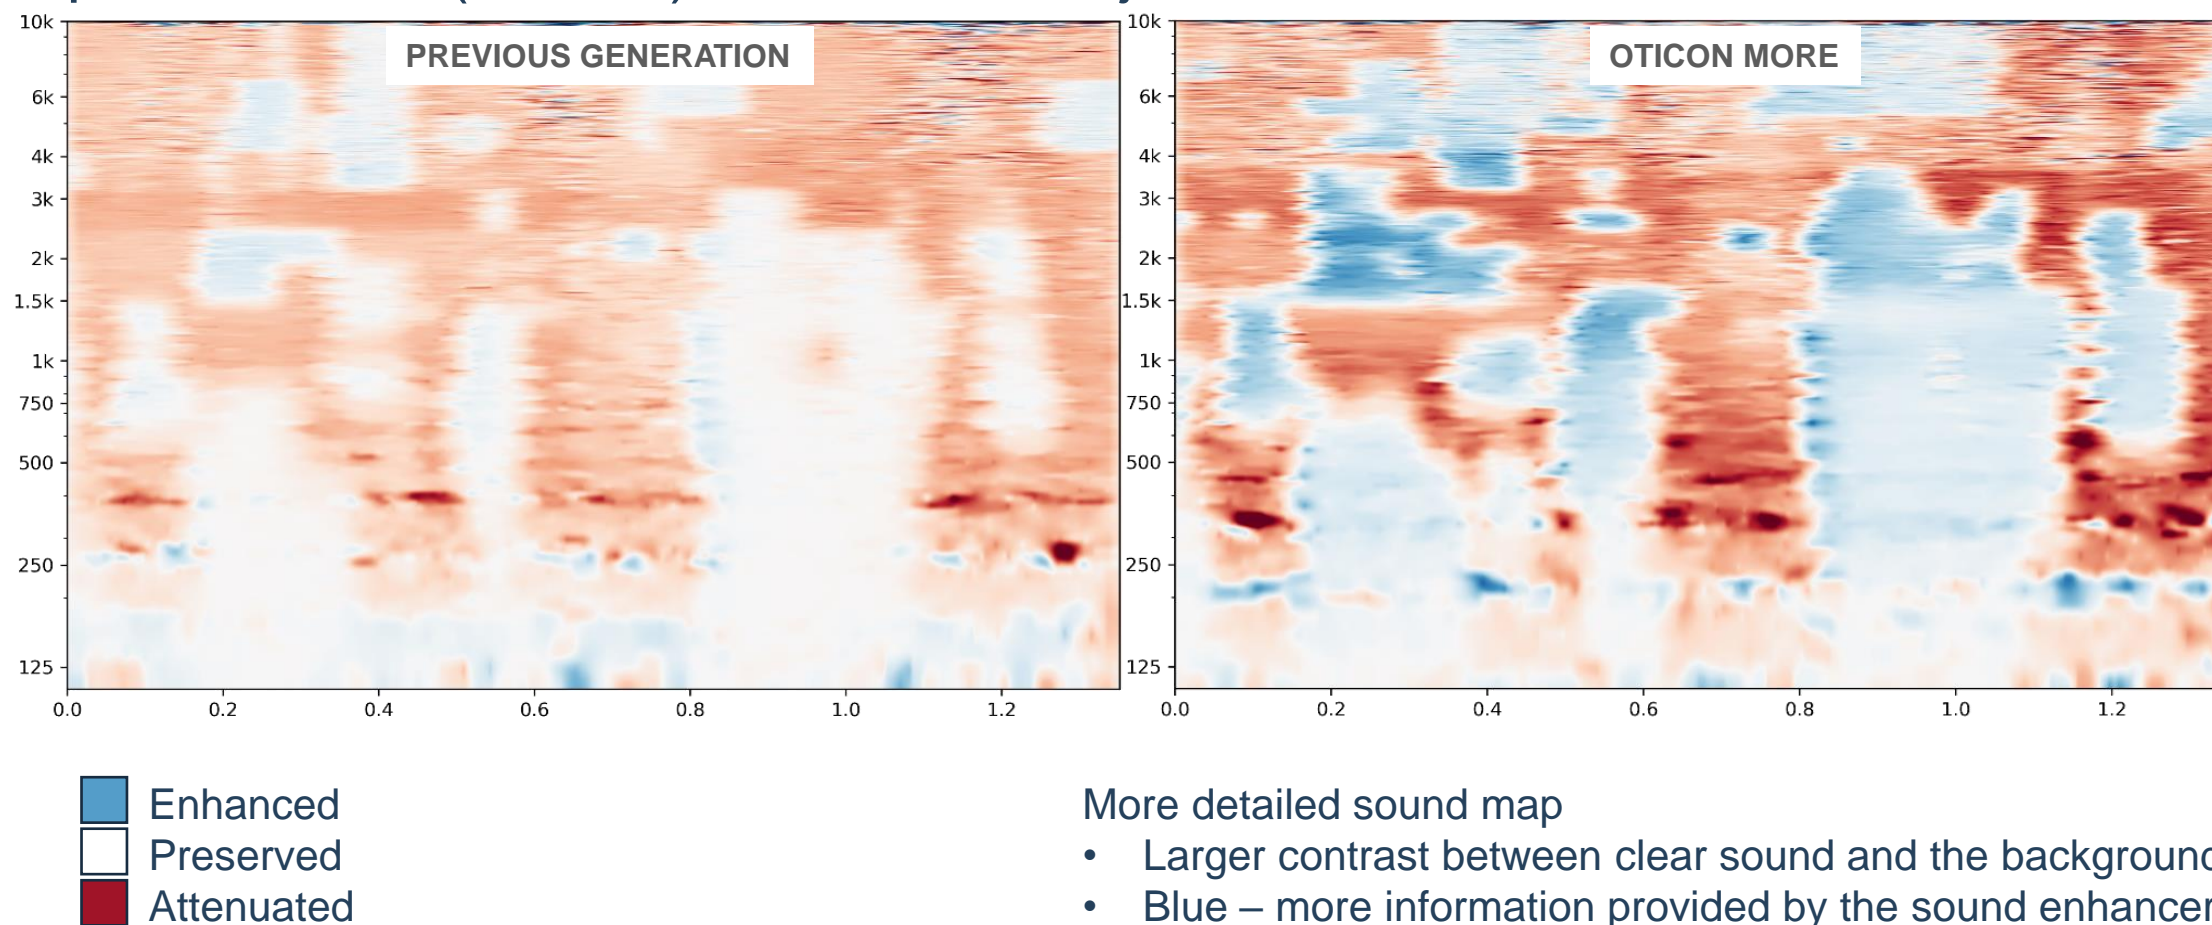

Deep neural network

Inspired by the brain

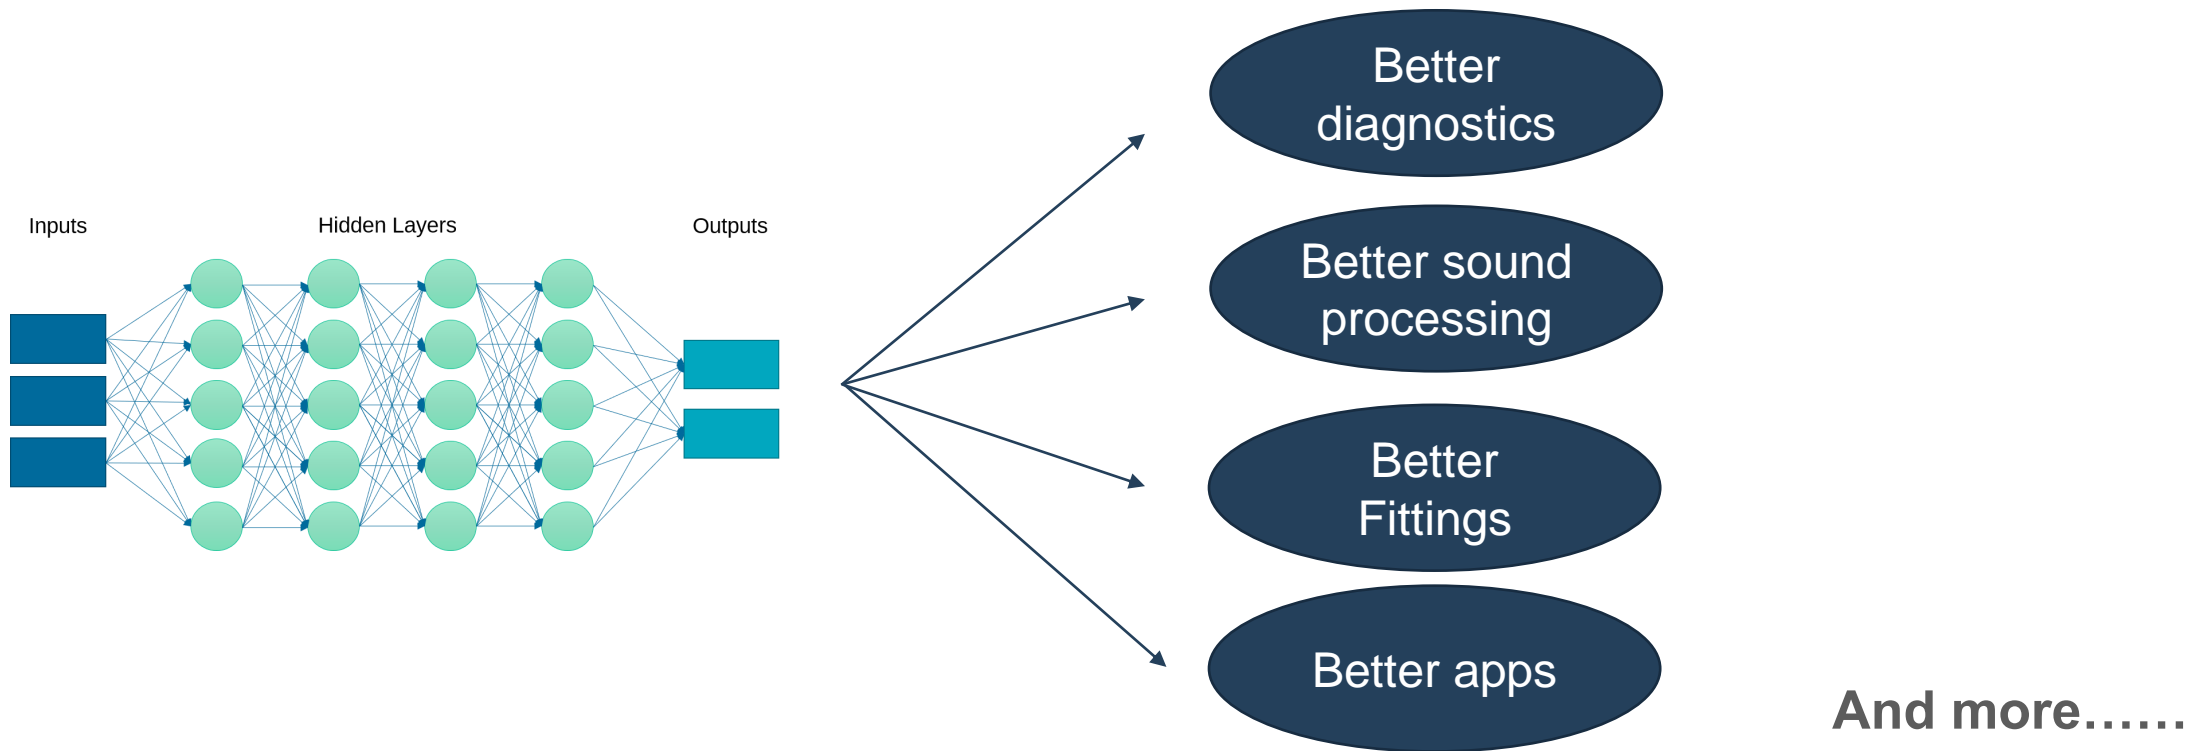

DNN Neural Sound Processing

Spoken words (Danish): "Venstre – Højre" in babble noise

DNN will ignite new innovations

Demant

Thank you
