## **Empowering** your life with a hearing solution as **individual** as you are

Everyone hears differently. The way we each perceive sounds and their subtle nuances is unique to us. That is why you will gain so much more from a hearing instrument specifically adapted to your hearing needs and the way you would like your world to sound.

Powered by an ensemble of unique technologies never before available in this category, Oticon Nera is our best mid-level hearing solution family yet. By blending seamlessly with the natural way our brain and ears work together, Nera gives you a clear sense of where the sounds around you are coming from. The integrated directional microphones then give you the freedom to focus on the sounds most important to you. Nera further enhances the sound experience with its unique whistling and feedback prevention functions that prevent tiring interruptions.

Once fitted by a hearing care professional, and shaped to your individual hearing needs and sound preferences, Nera will enable you to enjoy all round excellent sound quality and speech understanding with less listening effort.

## **Reliably exceptional**

Whatever the weather, Nera can be counted on to perform thanks to a design proven in rigorous testing. The instrument features seals that keep water, dust and debris out. And all key components are coated to be moisture resistant.

## **Experience Nera and get more out of the moments that are important to you.**

From colours to style and fit, how your Nera looks and feels is completely up to you. It's lightweight and discreet and can be worn behind or inside the ear.

**ENJOY THE PERFECT FIT**  
FOR YOUR EARS  
AND YOUR WORLD

We all have a different relationship to sound. That is why your hearing care professional is the key to ensuring that you get the absolute most out of Nera's technologies and personalised features.

Your hearing care professional will of course identify which sounds you can or cannot hear, but they will also focus on building up a full picture of your life: the situations you typically find yourself in and those in which you feel you could play a more active role.

This unique fitting process is designed to create truly personalised hearing care. It shapes Nera to meet both your hearing needs and the lifestyle you desire, and enables you to interact naturally and comfortably throughout the entire day.

## STAY IN THE LOOP, **EVERYWHERE**

There's no feeling quite like being fully involved in the world around you, and Nera – used together with ConnectLine – allows you to participate easily and wirelessly.

ConnectLine streams sound from devices such as your telephone or TV directly to your Nera hearing instruments. All in one integrated system. With ConnectLine you are always closely connected with loved ones on a landline phone\*, mobile or even video chatting. You can even watch TV\* and listen to music in the company of others at a volume that is comfortable for everyone.

Easy to set up and simple to use, Nera and ConnectLine can be tailored specifically to your needs and preferences, so that operation is intuitive.
